## MY PROJECTS:

### Trello Clone:

- A Trello clone where users can create and share their boards.
- Implemented frontend performance techniques like Optimistic UI and useMemo/useCallback hooks.
- Developed using **MongoDB**.

### Countries App:

- A simple app where users can search and see data about all countries.
- Developed using **GraphQL** and **Typescript (everywhere)**.

### Rey de Barba - W.I.P:

- Project where clients can make appointments at their barber shop, choose which barber will work on them and allow the owner to give special discounts.
- Developed using **React Native**.

### Food Recipes App:

- Individual project for **Henry** where users can browse and create their own cooking recipes.
- Developed with an **external API**.
- Developed using **React-Redux, HTML-CSS, Sequelize, PostgreSQL, Express, NodeJS**.

### Weather Cast App:

- A simple app where to find climate data of locations all around the world.
- Developed with an **external API**.

## PROFESSIONAL EXPERIENCE

### Frontend Software Developer - March 2022 / Present

#### Remotbase - Pakistan

- Worked designing and developing a Web3 based social media site.
- Enhanced communication performance within the site with emphasis on real-time video and audio streaming by remodelling the frontend, reducing rendering times and increasing communication quality.

## SOFT SKILLS

- Quick, hands-on learner.
- Complete predisposition to teamwork and team learning.
- Critical thinker, capable of taking context-based decisions.
- Foresight of problems an implementation may cause.
- Born problem solver.
- Strong written and verbal communication skills.
- High adaptability to new environments.

## ACADEMIC RECORD

### Henry - 800+ hours

#### FULL STACK WEB DEVELOPEMENT BOOTCAMP | 2021 - 2022

- 4 months, 8 hours a day + learning on my free time.
- Daily peer programming sessions.
- Multiple Fullstack projects, both individual and team oriented.
